

Title: Ordering Supplies from Pacific Medical
Audience: ED and Inpatient Physicians
Application(s): ASAP, CPOE
Date: 1/15/2019
Author: Lori Angarone

BRIEF OVERVIEW Beginning January 15th, 2019, there is a **new workflow** for ordering equipment from the vendor Pacific Medical. Instead of using nursing or general supply orders for placing equipment requests, you will use a **new order called “Orthotics and Prosthetics (Pacific Medical)” and select the desired equipment in the order composer.** Using this order enables accurate selection of equipment and a quicker response from the vendor.

The Pacific Medical staff will have limited access to HealthLink allowing them to receive the order via a message in their In Basket, as well as review the chart, enter notes, and capture equipment charges. For orders placed in the ED, or floor orders placed STAT, during non-business hours, or on a holiday, Nursing will also phone Pacific Medical to ensure the order’s receipt.

NEW PACIFIC MEDICAL ORDER

1. Open the patient’s chart and select the Orders activity.
2. In the Place new orders or order sets field, type in “**pac med**”. Synonyms to locate this order come from a list of Pacific Medical equipment and can be found on the second page of this tip sheet.

Name	User Version Name	Type
methyLPREDNISolone (MEDROL DOSE PACK) P		Order Panel

Name	Dose	Route	Frequency	Pref List	Phase of Care
hydrocortisone cream 1 % UD packet (aka MED-DERM		Topical	2 times d...	HHS MEDICATIO...
